

Rack Space Specification

Custodian rack space in an **ISO 27001** certified data centre built with resilience, power and efficient cooling with the environments concern at its core.

Clients benefit from Tier 3 infrastructure without the set up and management costs associated with running your own facility. Our rack space is personalised for you. We know one-size does not fit all and solutions need to be tailored to the individual client. Our flagship facility is located in Kent, offering part racks (u-space, quarter racks and half racks) through to full racks, private suites and even entire data rooms.

Full Rack
